WORK EXPERIENCE

02/10/2021 – 13/04/2022 – Nigeria

University Instructor

New Horizons

Taught undergraduate in office productivity tools: Word, Excel, PowerPoint

Taught undergraduate 'Introduction to machine learning using Python'

Responsible for setting and marking mid-semester and semester exams

15/06/2019 – 31/05/2020

Software developer

Uridium Technologies Limited

Implement or program all kinds of software systems based on specifications and designs by using programming languages, tools, and platforms.

Progressive Web App development using Firebase

Lekki, Lagos, Nigeria

27/04/2016 – 26/04/2017

Secondary education teaching professional

Rilfad International Group of Schools

Auchi, Edo State, Nigeria

01/07/2014 – 31/12/2014

Data entry operator

Ondo State Quality Education and Assurance Agency

Alagbaka, Akure, Nigeria

EDUCATION AND TRAINING

17/01/2018 – 06/2019 – Akoka, Lagos, Nigeria

Master of Science in Statistics

University of Lagos

11/03/2018 – 14/03/2018 – Akoka, Lagos State, Nigeria

Certificate of Participation in the 5th Annual International Conference On Mathematical Analysis And Optimization: Theory And Applications

Department of Mathematics and Department of Computer Sciences, University of Lagos

06/02/2017 – 06/07/2017 – United Kingdom

Award in Health and Safety at Work

United Kingdom SHE Organisation

06/02/2017 – 06/07/2017 – United Kingdom

Award in Risk Assessment Practical Application

United Kingdom SHE Organisation

06/02/2017 – 06/07/2017 – United Kingdom

Award in Environmental Awareness

United Kingdom SHE Organisation

27/04/2016 – 26/04/2017 – Nigeria

Certificate of National service

National Youth Service Corps

30/09/2010 – 30/09/2015 – Akure, Nigeria

Bachelor of Technology in Statistics

Federal University of Technology

01/2002 – 06/2008 – Oshodi, Lagos, Nigeria

Testimonial, Certificate and STATEMENT OF RESULT

Ewutuntun Junior Grammar School (2002-2005). Ewutuntun Senior Grammar School (2005/6-2008) (Result

1998 – 2002 – Oshodi, Lagos, Nigeria

Primary School Testimonial

Matol Nursery and Primary School

LANGUAGE SKILLS

MOTHER TONGUE(S): Yoruba

OTHER LANGUAGE(S): English

DIGITAL SKILLS

My Digital Skills

GIT (GitHub) / Android app development / Google Firebase / HTML/CSS/JS/NodeJS / Flutter basics / Python (Anaconda) basic user / R/R-Studio / JSON / RESTful api / Angular

Mr. Adewusi Johnson – CEO of Uridium Technologies Limited – ajohnson@uridiumtechnologies.com – (+234) 7032364108

My former boss

PROJECTS

CURRENT

PayAhead, Uridium Technologies website

https://payahead.net https://uridiumtechnologies.com

PayAhead. A proposed progressive web app to make payments. Still needs a lot of touch on the UI/UX. Backend was with Node.JS and it is fine.

Uridiumtechnologies.com. Refurbished my former companies website. Transfered hosting to Google Firebase and Godaddy to get full control over the website.

01/01/2014 – CURRENT

Others and personal

https://github.com/jtblog https://jtblog.shinyapps.io/unilag-weather/

J-Suite.

This proposed C# desktop app does face detection and motion detection using AForge/Accord APIs (they are both OpenCV wrappers)

UNILAG-WEATHER

My Masters degree project. I streamed JSON weather data from darksky.net (using an R wrapper API). Display code and graphs on https://jtblog.shinyapps.io/unilag-weather/

I performed multinomial logistic regression on the data. I suspended showing the results and predictions in the Notes section of the website because I was done defending the project at the University.

BINARY_Python and FXCM_Python.

You are going to love this one. BINARY_Python streams JSON price data from Binary.com while FXCM_Python from FXCM.com using IPython Notebooks. Both companies are forex brokers. Pair trading and Arbitrage opportunities was what I was looking for and trying to implement before going live on these platforms. Please check this link out using a Chrome browser for visual

https://github.com/jtblog/FXCM_Python/blob/master/FXCM%20Trader.ipynb

I have worked personally on some in Android Java and Flutter using Android studio that I chose not to document

All source code can be found on https://github.com/jtblog

CURRENT

Magnetic Engine with reguaging sections

Oweing to the rising cost of petrol, diesel and gas, there is a urgent need for a patentable engine.

An above 90% efficient and possibly independent magnetic engine/prime mover.

A possible use of piezo-electric generator. To convert vibrations of engine to electricity.

Back emf harnessing.

HOBBIES AND INTERESTS

Enthusiast in machines, renewables, tech and green energy

I want to be a contributor to human transition to a green environment by recycling PET bottles. I have made several attempts to build a plastic shredder. I also want to work on a machine that will automatically peel off the pvc labels and another that makes some separation. Fund has always been the challenge. Links to images and videos have been attached below.

I can make a generator especially the one called an Axial Flux permanent magnet generator majorly used in wind turbines. It was my first attempt. Check out the images and photos in the links below.

Or the ones uploaded to my LinkedIn profile:

http://www.linkedin.com/in/temitope-obagbemisoye-btech-msc-hse

And some more I am still enthusiastic and working on.
